

City Trading™ Blackberry Guide

Spread betting and CFD trading typically require the deposit of a small percentage of the total trade value. As the financial outcome is determined by the price movement on the total trade value, profits and losses can quickly exceed the initial deposit. Ensure you understand the risks as these products are not suitable for everyone. These products are only intended for people who are over 18.

C: Using the Platform

1. Menu

At any point while you are using the app, you can access other functionality by pressing the handset 'menu' key.

The following menu will pop up:

2. Account Summary Tab

When you logon to City Trading™ you will land on the Account Summary tab. This section allows you to view your available margin and account summary at a glance.

Currency	Cash	P&L	Margin	Resource
Total GBP	940.84	-21.60	720.00	199.24

Currency	is your base currency
Cash	is the total current cash equity deposited into the account. E.g. 10,000 has been deposited in this account.
P&L	is the unrealised sum of profits/losses across all open positions
Margin	is the deposit needed in respect of each open position on your account
Resource	is the sum of your total cash and unrealised profits/losses across all open positions

3. Markets

Summary account balances

You can view your account balances on multiple tabs within City Trading™ such as the Markets, Positions and Watch List tabs

Your account balances will list your total Cash, Unrealised P/L, Margin and Resource to give you maximum awareness of your account.

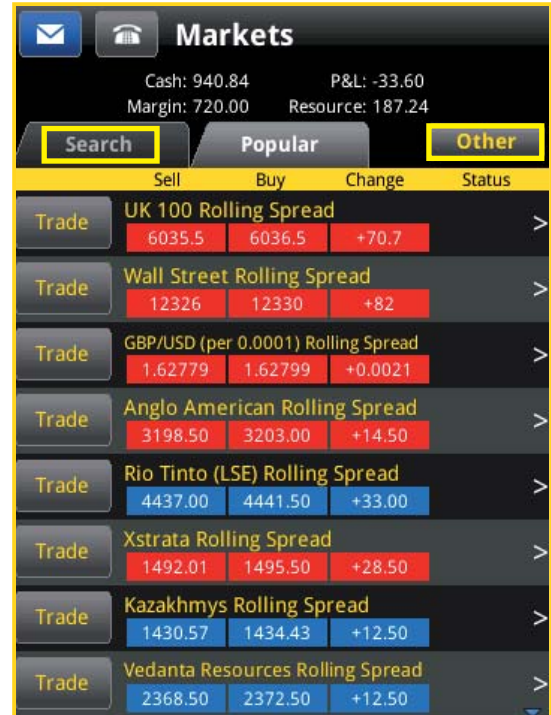

Please note that to ensure that your open positions are not closed out, you should avoid the resource figure going negative.

For further details, please see the Margin Help Sheet or Important Documents page.

Finding your market

The Markets page is preset to include 2 search buttons:

Search	search for markets
Other	search using market groups

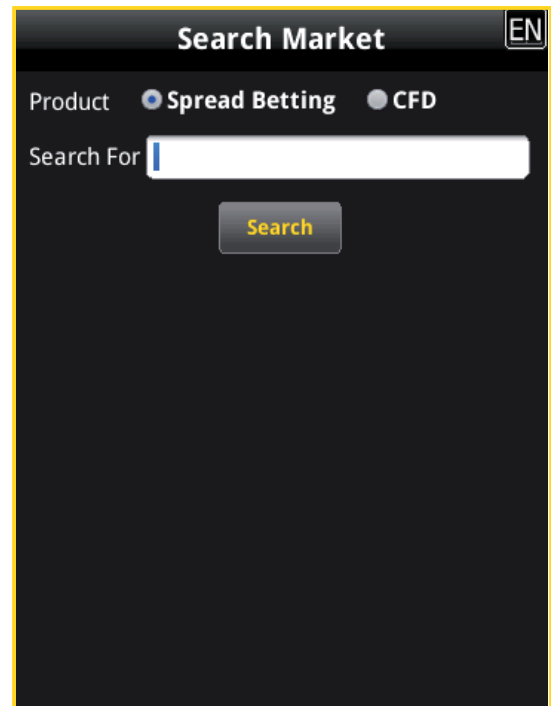

Using search

To search for your desired market, select the product you are searching for i.e. spread betting or CFD and then manually type in the name of the market and click search. You must enter a minimum of 3 characters.

Using the Other > selector

This search facility works by grouping together similar instruments by category, for example; Indices > UK.

By selecting instruments within these groups, they will automatically replace the default group of Popular Markets in the Markets Tab.

4. Managing Watch Lists

You can monitor your favourite markets by grouping them together in a Watch List.

Add/remove markets to a Watch List

To add a market to a Watch List you must first tap on the market and then the 'Add to...' button.

To remove an item from a Watch List you can tap 'edit' within the Watch List tab and select delete on the item you wish to remove.

The screenshot shows the 'Watch List' screen. At the top, account statistics are displayed: Cash: 915.84, Margin: 865.24, P&L: -65.57, and Resource: -14.96. There are three tabs: 'Watchlist 3 live', 'Watchlist 1', and 'Watchlist 4 test'. An 'Edit' button is highlighted in the top right corner. Below the tabs is a table with columns for 'Sell', 'Buy', 'Change', and 'Status'. Each row represents a market with a 'Trade' button on the left and a chevron on the right.

	Sell	Buy	Change	Status
Trade	1.44864	1.44884	+0.0010	>
Trade	1.62678	1.62708	+0.0012	>
Trade	1.04936	1.04976	+0.0058	>
Trade	0.89030	0.89060	-0.0001	>

To finish editing your list please press the back arrow.

You can also delete markets from the main Watch List page by Tapping the market you want to delete in the edit mode.

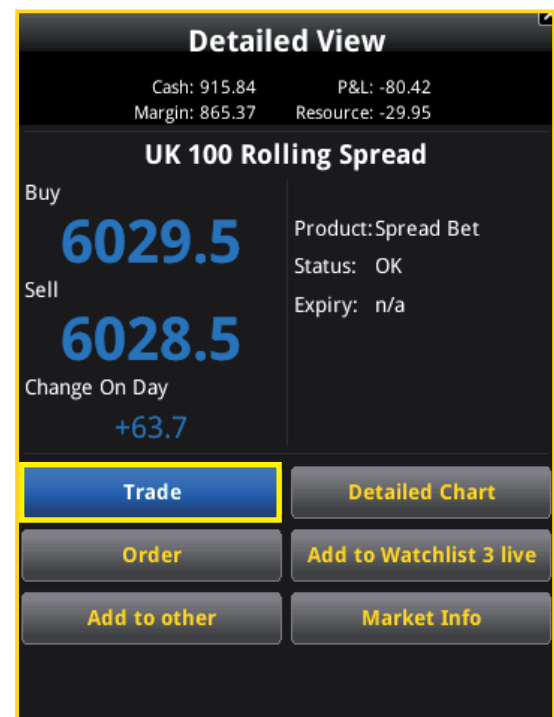

5. Placing a Trade

You can place a Trade as well as place and edit Orders from the Detailed View of a market.

Placing a Trade

Step 1

Once you have chosen the market you wish to trade, tap the specific market and you will be presented with the Detailed View ticket. Tap Trade to open the Trade ticket. The Trade ticket will then show the BUY and SELL prices for that market. These prices will update in real time.

Step 2

Select BUY or SELL and enter the quantity you would like to Trade.

If you wish to attach a linked Stop or linked Limit to the Trade then enter these in the appropriate boxes.

These are types of closing orders and will be left to Our Quote, Good Till Cancelled (GTC).

If the market offers guaranteed orders, you can tick the check box and enter a valid Stop. This will result in a small charge being debited from your account upon confirmation of the Order.

Step 3

To complete your Trade please tap Do Trade.

The screenshot shows the 'Trade' interface for 'UK 100 Rolling Spread'. At the top right, there is a small box with the number '123'. The main title is 'UK 100 Rolling Spread'. Below the title, there are two price points: 'Buy 5907.3' and 'Sell 5906.3'. To the right, there is a 'Select Trade Direction' section with two buttons: 'Sell' and 'Buy'. Below this, there are fields for 'Expires On' (n/a) and 'Bet Per' (1). The 'Quantity' field contains '<quantity>'. The 'Limit' field contains '<limit>' with a value of '< 5906.3'. The 'Stop' field contains '<stop>' with a value of '> 5907.3'. There are two checkboxes: 'Auto Rollover' (unchecked) and 'Guaranteed' (unchecked). At the bottom, there is a 'Do Trade' button.

Step 4

The system will then process the request for a Trade. If it is successful, a Trade confirmation screen will appear and your new position will appear in your Positions tab.

The screenshot shows a 'Trade Confirmation Opening Position' dialog box. The title is 'Trade Confirmation Opening Position'. The text inside the dialog box reads: 'Account Number: DM873205', 'Reference Number: 453482822', 'Market: Wall Street Rolling Spread', 'Buy/Sell: Sell', 'Quantity: 1.00', 'Price: 12497', and 'Execution Date: 18/05/2011 09:29'. At the bottom of the dialog box, there is an 'OK' button.

Quotes

If you enter a quantity greater than the maximum size set for a market then your request to Trade will be sent to a dealer who will then send you a price back. You will then have the option to Buy or Sell at the given price in the quantity you have requested.

The screenshot shows a 'Wait for a quote' dialog box. The title is 'Wait for a quote'. The text inside the dialog box reads: 'Your trade has been sent to a dealer.' and 'Please wait for a quote.'. At the bottom of the dialog box, there is a 'Cancel Trade' button.

Closing a Trade

You can close a Trade by fully closing it, partially closing it or attaching an Order to close. This functionality can be found in the Positions tab.

Fully Close

Fully close the Trade by tapping on the Close button in the Positions tab. The quantity will automatically appear in the Trade ticket (this is editable if you decide to partially close your position). You can then click on the relevant Buy or Sell button and receive a Trade confirmation.

Partial Close

Partially close the Trade by entering the amount you want to close (less than the quantity currently open) in the quantity box of the Trade ticket before tapping on the relevant Buy or Sell button to Close the position.

6. Orders

You are able to leave opening and closing orders for trades to be placed when markets reach designated trigger levels. City Trading™ gives you the facility to leave a variety of Order types. At all times, the rules regarding orders are governed by our Terms and Policies which can be found here

Attach a closing Order

You can attach a linked order such as a stop or limit order to an existing trade to close it. This can be done by adding the linked stop or linked limit when you initially place the new trade.

It can also be done by clicking on the position within the Positions tab and selecting Closing Orders.

Placing a new Opening Order

Step 1

Once you have chosen the market you wish to place an order on, tap it and select order.

Detailed View

Cash: 17533.80 P&L: 66.53
Margin: 2931.75 Resource: 14668.58

UK 100 Rolling Spread

Buy **5915.3**
Sell **5914.3**
Change On Day **+43.5**

Product: Spread Bet
Status: OK
Expiry: n/a

Trade Detailed Chart
Order Add to Test add3
Add to other Market Info

Step 2

Fill out the relevant sections of the order including:

Sell or Buy	Whether you want to Sell or Buy the market
Quantity	How much you want to trade
Price Level	What level you wish to enter the market
Guaranteed	Do you want to guarantee your order price for a small charge
Good Until	When do you want the order to expire

Order 123

BAE Systems Rolling Spread

Buy **335.34**
Sell **334.57**
Expires On n/a

You will BUY
Sell Buy

Quantity
Price
> 335.34
< 334.57

Guaranteed

Good Until Day End Cancelled Time

Stop & Limit
OCO Order Update Order

Step 3

You can attach full or partial if done/contingent orders by clicking on the Stop and Limit button at the bottom of the order form.

You need to fill out the relevant components noted below of the closing order before clicking Set Stop & Limit:

Stop Level	The level you wish to stop all or part of your losses
Quantity	How much you want to trade
Guaranteed	Do you want to guarantee your order price for a small sub charge
Limit Level	The level you wish to take all or part of your profits
Good Until	When do you want the order to expire

If not successful, you will receive the relevant error message explaining why the order has not been placed. If you leave an order working on GTC, GFD or GTT (please see Order Help Sheet for more information about order types) and the market expires, the order will be deleted automatically.

GFD orders are set to expire at the end of day within the time zone of the market and not your local time zone. Thus if you leave an order GFD on Monday, it will delete automatically at the End of day time set for that market.

Details of the trading hours can be found on the Information popup when you click this button. If you leave a GFD on UK 100 Daily Future Tue Spread and it is still Monday, this order will not carry through to the following day; in this instance a more appropriate type of order is GTT or GTC.

Amending an Order

Once an order has been placed, you will then have the option to delete or edit the details of this order. All orders, be they new or contingent orders can be edited from the orders section of the Positions tab. Simply tap on the order you wish to amend, make the relevant changes and click on Update Orders.

Order types

For more details on the types of orders that are available, please go to our Orders help sheets.

The screenshot shows a 'Close Order' interface for 'QinetiQ Group plc Sep 11 Spread'. It features a dark background with white and yellow text. At the top right, there is a '123' icon. The main title is 'Close Order'. Below it, the instrument name 'QinetiQ Group plc Sep 11 Spread' is displayed. The 'Buy' price is 119.33 and the 'Sell' price is 117.48. The form includes several input fields: 'Stop' (set to < 117.48 with a value of 110.00), 'Quantity' (set to <= 1.00 with a value of 1.00), 'Guaranteed' (checkbox), 'Limit' (set to > 119.33 with a placeholder '<limit price>'), and another 'Quantity' field (set to <= 1.00 with a placeholder '<quantity>'). The 'Good Until' section has three buttons: 'Day End', 'Cancelled', and 'Time'. At the bottom, there is a yellow 'Update Orders' button.

Account History

This tab allows you to view a history of your Trades as well as any cash flow that has gone through your account. By clicking on each entry, you can view the specific details relating to that Trade including:

- Realised profit/loss
- Date of closing trade
- Opening price
- Closing price
- Serial number
- Quantity

7. Charts

Introduction

Streaming charts through City Trading offers you a live streaming charting package.

The streaming charts element can be accessed from within the City Trading application, using the 'Detailed Chart' button. This button can be found when you tap on a market to show further options.

Charting Features

The streaming charts package provides you with the ability to analyse historical data and identify price patterns and trends, with historical and live streaming prices.

Charting utilises both the portrait and landscape orientations of the phone, meaning you can take advantage of customisable indicators in portrait view, or a full screen, streaming and historical chart in landscape view.

Technical indicators, such as Stochastic Oscillator, Relative Strength Index (RSI) and MACD are available, while standard indicators such as Moving Average (MA) are also offered.

This guide explores the various layouts of the streaming charts package and the additional charting tools that are available to you.

a) Portrait Orientation

Upon activation, the streaming charts will begin to load. Depending on the strength of your network connection, this can be immediate, or take a few seconds. Streaming charts in portrait view shows the chosen market's historical and streaming price chart in the upper part of the screen. In the bottom part of the screen, we show three of our most commonly used indicators:

Relative Strength Index (RSI), Stochastic Oscillator and Moving Average Convergence Divergence (MACD).

It is possible to scroll left and right to see more market data by swiping your finger left and right anywhere in the top part of the screen. Swiping your finger left and right at the bottom of the screen controls the price cursor (the grey vertical line), which, when resting on a chosen price point, shows the price information for that point in time at the very top of the chart.

This information includes 'Open/High/Low/Close' values, as well as 'Date/Time'. Also at the top of the screen, market name and current price are displayed. The chart view can also be customised using pinch gestures, to zoom in and out.

Key

A1	Market Detail
A2	Current Price
A3	Price Cursor Line
A4	Market Name

Accessing Charting menu

By pressing the handset 'menu' button whilst in a chart, it is possible to access charting specific menus.

'Period': Used to change the chart time period. The time period is set to 5 minutes by default, but the next time you use the charting application, the period used last will be shown as default.

'Settings': Further basic and advanced chart settings, including the chart type and indicator variables, can be amended from the chart settings view. See the chart settings section for further information.

b) Landscape Orientation

Landscape streaming charts enlarges the main chart to fill the entire screen. Like in portrait orientation, it is possible to scroll left and right to see more market data by swiping in the top part of the screen, move the price cursor using the bottom part of the screen, and use pinch gestures to zoom in and out.

B1 **Price Information**

B2 **Current Price**

B3 **Price Cursor**

B4 **Market Name**

Again, by pressing the handset 'menu' button whilst in the Landscape view, it is possible to access charting specific menus.

Chart Settings

The chart settings can be accessed by tapping the button on the lower toolbar in portrait mode. In the chart settings, users can change the following settings of the chart view:

- Chart type: Candle, Line, Bar
- Relative Strength Index (RSI)
 - o RSI period - Configure the RSI period
 - o Wilder's RSI - Use Wilder's RSI technique – On/Off
 - o Use 80/20 for RSI
If unchecked, 70/30 lines will be used
- Simple/Exponential Moving Average (MA/EMA)
 - o MA/EMA – Enable to see Moving Average lines
 - o Shorter MA/EMA period
 - o Medium MA/EMA period
 - o Longer MA/EMA period
 - o EMA – use EMA moving average technique
- Stochastic Oscillator (Stoch)
 - o Fast %K – configure loopback period for Fast %K
 - o Slow %K – configure period for Slow %K
 - o Slow%D – configure period for Slow %D
- Moving Average Converg/Diverg (MACD)
 - o Shorter EMA period – configure shorter Exponential Moving Average (EMA) period
 - o Longer EMA period – configure longer Exponential Moving Average (EMA) period
 - o Signal line period – configure period for signal line
- Colours
 - o Stoch/MACD Colours – enable to see colours for signal line crossover
