

City Trading™ Guide

Spread betting and CFD trading typically require the deposit of a small percentage of the total trade value. As the financial outcome is determined by the price movement on the total trade value, profits and losses can quickly exceed the initial deposit. Ensure you understand the risks as these products are not suitable for everyone. These products are only intended for people who are over 18.

Apple, the Apple logo, iPod, iPod touch, and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries. iPhone is a trademark of Apple Inc. App Store is a service mark of Apple Inc.

Logging in

Once you have downloaded the City Trading™ app from the app Store, simply tap on the City Trading™ launch icon and you will be presented with the log in page. Enter your user name (account number) and password and tap 'Login'.

You can also select the 'Remember Me' option which will save your log in details to the application including your password to save you manually entering this information at every log in. Please refer to our [FAQ's](#) for security information.

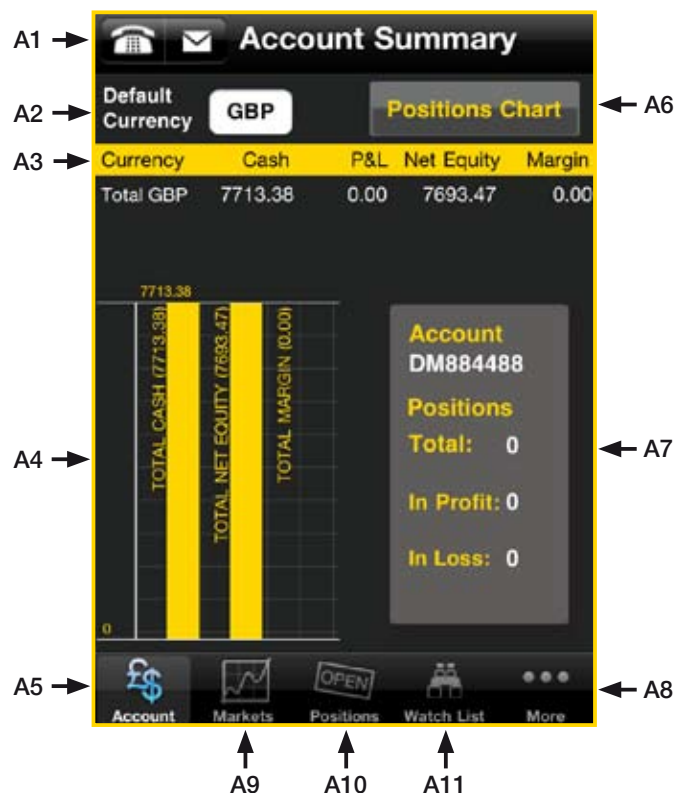

Please note that you must have a City Index spread betting or CFD account to access the City Trading™ app.

The image shows the login interface of the City Index app. At the top, the 'CITYINDEX' logo is displayed in white and yellow. Below the logo, there are three input fields: 'Account No.' with a placeholder '<username>', 'Password' with a placeholder '<password>', and a 'Remember Me' toggle switch currently set to 'OFF'. A yellow 'Login' button is positioned below these fields. At the bottom of the screen, there is a text prompt 'To apply for an account please visit www.cityindex.co.uk', followed by the 'City Trading' logo and 'Version 4.1'.

Using the Platform

1. Account Summary Tab

When you logon to City Trading™ you will land on the Account Summary tab.

This section allows you to view your available margin and account summary at a glance.

Currency	is your base currency
Cash	is the total current cash equity deposited into the account. E.g. 10,000 has been deposited in this account.
P&L	is the unrealised sum of profits/losses across all open positions
Net Equity	is the sum of your total cash and unrealised profits/losses across all open positions
Margin	is the deposit needed in respect of each open Position on your account

Currency	Cash	P&L	Net Equity	Margin
Total GBP	7713.38	0.00	7693.47	0.00

2. Markets Tab

Summary account balances

You can view your account balances on multiple tabs within City Trading™ such as the Markets, Positions and Watch List tabs. Your account balances will list your total Cash, Unrealised P/L, Margin and Total Position to give you maximum awareness of your account.

Please note that to ensure that your open positions are not closed out, you should avoid the Total Position figure going negative. For further details, please see the [Margin Help Sheet](#) or [Important Documents](#) page.

Finding your market

The Markets page is preset to include 2 search buttons:

Search	search for markets
Other	search using market groups

Using search

To search for your desired market, highlight the product you are searching for i.e. spread betting or cfd and then manually type in the name of the market and click search. You must enter a minimum of 3 characters.

	Sell	Buy	Change	Status
Trade UK 100 Rolling Spread	5722.0	5723.0	-24.0	>
Trade Wall Street Rolling Spread	11059	11065	-42	>
Trade GBP/USD Rolling Spread	15736	15739	-139	>
Trade Anglo American Rolling Spread	2785.21	2792.29	-60.75	>
Trade Rio Tinto (LSE) Rolling Spread	3981.01	3991.48	-97.50	>
Trade Xstrata Rolling Spread	1252.75	1256.26	-53.75	>
Trade Kazakhmys Rolling Spread	1326.67	1331.33	-32.50	>

Using the Other > selector

This search facility works by grouping together similar instruments by category e.g. Indices>UK. By selecting instruments within these groups, they will automatically replace the default group of Popular markets in the Markets Tab.

3. Managing Watch Lists

You can monitor your favourite markets by grouping them together in a Watch List.

You can create and view multiple Watch Lists while you can also amend and delete existing Watch Lists.

Add/remove markets to a Watch List

To add a market to a Watch List you must first tap on the market and then the 'Add to...' button.

To remove an item from a Watch List you can tap 'edit' within the Watch List tab and select delete on the item you wish to remove. To finish editing your list please tap done.

You can also delete markets from the main Watch List page by swiping your finger across the market you want to delete, and then tap the 'Delete' button.

4. Placing a Trade

You can place a Trade as well as place and edit Orders from the Detailed View of a market.

Placing a Trade

Step 1

Once you have chosen the market you wish to Trade, tap the specific market and you will be presented with the Detailed View ticket. Tap Trade to open the Trade ticket.

The Trade ticket will then show the BUY and SELL prices for that market. These prices will update in real time.

Step 2

Select BUY or SELL and enter the quantity you would like to Trade.

If you wish to attach a linked Stop or linked Limit to the Trade then enter these in the appropriate boxes.

These are types of closing Orders and will be left to Our Quote, Good Till Cancelled (GTC).

If you would like to know more about Order types, please go to our [Orders help sheet](#).

If the market offers guaranteed Orders, you can tick the check box and enter a valid Stop. This will result in a small charge being debited from your account upon confirmation of the Order.

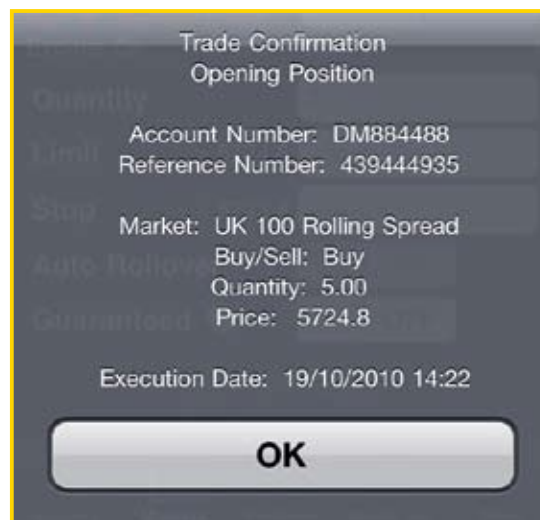

Step 3

To complete your Trade please tap Do Trade.

Step 4

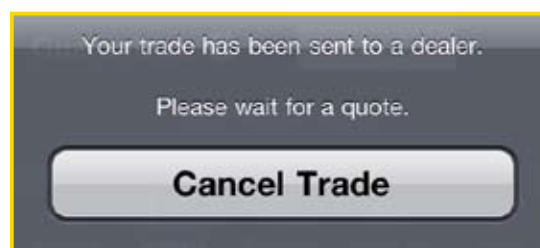

The system will then process the request for a Trade.

If it is successful, a Trade confirmation screen will appear and your new position will appear in your Positions tab.

Quotes

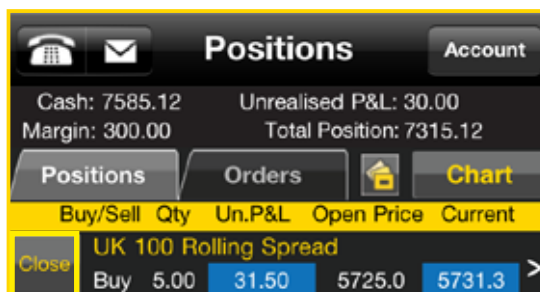

If you enter a quantity greater than the maximum size set for a market then your request to Trade will be sent to a dealer who will then send you a price back. You will then have the option to Buy or Sell at the given price in the quantity you have requested.

Closing a Trade

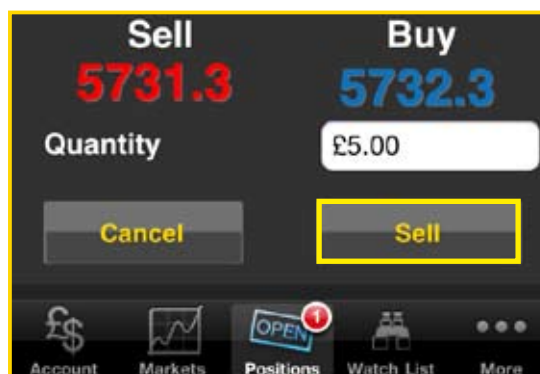

You can close a Trade by fully closing it, partially closing it or attaching an Order to close.

This functionality can be found in the Positions tab.

Fully Close

Fully close the Trade by tapping on the Close button in the Positions tab. The quantity will automatically appear in the Trade ticket (this is editable if you decide to partially close your position). You can then click on the relevant Buy or Sell button and receive a Trade confirmation.

Partial Close

Partially close the Trade by entering the amount you want to close (less than the quantity currently open) in the quantity box of the Trade ticket before tapping on the relevant Buy or Sell button to Close the position.

Positions **Single Position**

Cash: 7585.12 Unrealised P&L: 31.50

5. Orders

You are able to leave opening and closing orders for trades to be placed when markets reach designated trigger levels. City Trading™ gives you the facility to leave a variety of Order types.

At all times, the rules regarding orders are governed by our Terms and Policies which can be found here

Attach a closing Order

You can attach a linked order such as a stop or limit order to an existing trade to close it. This can be done by adding the linked stop or linked limit when you initially place the new trade.

It can also be done by clicking on the position within the Positions tab and selecting Closing Orders.

Positions **Single Position**

Click on the plus sign to attach a linked order and enter the order stop and/or limit levels before clicking on Create Orders. Once the order(s) have been processed successfully, you will be presented with an order success notification.

The screenshot shows the 'Orders On Position' screen for the 'UK 100 Rolling Spread' instrument. At the top, there are two tabs: 'Single Position' and 'Orders On Position'. Below the tabs, account statistics are displayed: Cash: 7585.12, Margin: 300.00, Unrealised P&L: -10.00, and Total Position: 7275.12. The instrument name 'UK 100 Rolling Spread' is prominently displayed. Below it, the 'Trade Type' is set to 'Buy' and the 'Quantity' is 5.00. A yellow plus sign icon is visible in the top right corner, indicating the option to attach a linked order.

We also offer the facility to set partial orders, allowing you to determine the quantity as well as the price at which the order should be placed.

The screenshot shows the 'Close Order' screen for the 'UK 100 Rolling Spread' instrument. At the top, there are two tabs: 'Orders On Position' and 'Close Order'. Below the tabs, the instrument name 'UK 100 Rolling Spread' is displayed. The current market prices are shown: Sell 5723.8 and Buy 5724.8. The 'Stop' order section has a price of 5700 and a quantity of 5.00. The 'Guaranteed' checkbox is turned off. The 'Limit' order section has a price of 5800 and a quantity of 5.00. Below these, there are three options for 'Good Until': 'Day End', 'Cancelled', and 'Time'. A 'Create Orders' button is located at the bottom of the form. The bottom navigation bar includes icons for 'Account', 'Markets', 'Positions' (which is highlighted with a red notification bubble), 'Watch List', and 'More'.

Placing a new Opening Order

Step 1

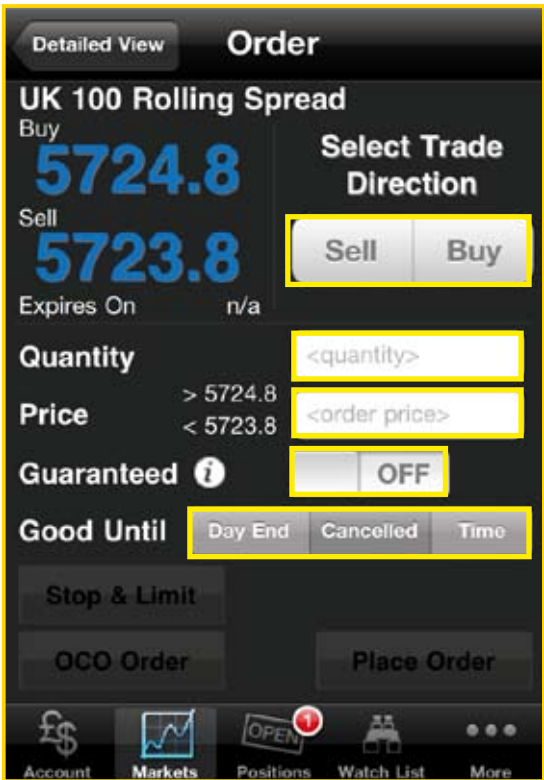

Once you have chosen the market you wish to place an order on, tap it and select order.

Step 2

Fill out the relevant sections of the order including:

Sell or Buy	Whether you want to Sell or Buy the market
Quantity	How much you want to trade
Price Level	What level you wish to enter the market
Guaranteed	Do you want to guarantee your order price for a small charge
Good Until	When do you want the order to expire

Step 3

You can attach full or partial if done/contingent orders by clicking on the Stop and Limit button at the bottom of the order form.

You need to fill out the relevant components noted below of the closing order before clicking Set Stop & Limit:

Stop Level	The level you wish to stop all or part of your losses
Quantity	How much you want to trade
Guaranteed	Do you want to guarantee your order price for a small sub charge
Limit Level	The level you wish to take all or part of your profits
Good Until	When do you want the order to expire

If not successful, you will receive the relevant error message explaining why the order has not been placed.

If you leave an order working on GTC, GFD or GTT (please see Order Help Sheet for more information about order types) and the market expires, the order will be deleted automatically. GFD orders are set to expire at the end of day within the time zone of the market and not your local time zone. Thus if you leave an order GFD on Monday, it will delete automatically at the End of day time set for that market.

Details of the trading hours can be found on the Information popup when you click this button. If you leave a GFD on UK 100 Daily Future Tue Spread and it is still Monday, this order will not carry through to the following day; in this instance a more appropriate type of order is GTT or GTC.

Amending an Order

Once an order has been placed, you will then have the option to delete or edit the details of this order. All orders, be they new or contingent orders can be edited from the orders section of the Positions tab. Simply tap on the order you wish to amend, make the relevant changes and click on Update Orders.

Order types

For more details on the types of orders that are available, please go to our [Orders help sheets](#).

The screenshot shows the 'Close Order' interface for the 'UK 100 Rolling Spread' instrument. At the top, there are 'Order' and 'Close Order' buttons. The current prices are 'Sell 5724.8' and 'Buy 5725.8'. Below this, several fields are visible: 'Stop' is set to 5600, 'Quantity' is 5.00 (with a '<= 5.00' indicator), 'Guaranteed' is set to 'OFF', 'Limit' is 6000, and another 'Quantity' field is also 5.00. The 'Good Until' section has three options: 'Day End' (selected), 'Cancelled', and 'Time'. A prominent yellow box highlights the 'Set Stop & Limit' button at the bottom. The bottom navigation bar includes icons for 'Account', 'Markets', 'Positions' (with an 'OPEN' indicator and a red notification bubble), 'Watch List', and 'More'.

6. Charts

Introduction

Streaming charts through City Trading offers you a comprehensive streaming charting package, complete with technical analysis tools.

The streaming charts element can be accessed from within the City Trading application, using the 'Detailed Chart' button. This button can be found when you tap on a market to show further options.

Charting Features

The streaming charts package provides you with the ability to analyse historical data and identify price patterns and trends, with historical and live streaming prices.

Charting utilises both the portrait and landscape orientations of the iPhone, meaning you can take advantage of customisable indicators in portrait view, or a full screen, streaming and historical chart in landscape view.

Technical indicators, such as Stochastic Oscillator, Relative Strength Index (RSI) and Bollinger Bands are available, while standard indicators including Moving Average (MA) and Fibonacci retracement levels are also offered, among others.

This guide explores the various layouts of the streaming charts package and the additional charting tools that are available to you.

a) Portrait Orientation

Upon activation, the streaming charts will flip into view. Streaming charts in portrait view shows the chosen market's historical and streaming price chart in the upper part of the screen. In the bottom part of the screen, we show three of our most commonly used indicators: Relative Strength Index (RSI), Stochastic Oscillator and Moving Average Convergence-Divergence (MACD).

It is possible to scroll left and right to see more market data by swiping your finger left and right anywhere in the top part of the screen. Swiping your finger left and right on the bottom of the screen controls the price cursor (the grey vertical line), which, when resting on a chosen price point, shows the price information for that point in time at the very top of the chart.

This information includes 'Open/High/Low/Close' values, as well as 'Date/Time'. Also at the top of the screen, market name and current price are displayed.

The chart view can also be customised using pinch gestures, to zoom in and out.

Key

A1	Exits Charting
A2	Previous Market
A3	Next Market
A4	Select a Chart Time Period
A5	Chart Settings
A6	Add High/Resistance Line
A7	Add Low/Support Line
A8	Market Detail
A9	Current Price
A10	Jump to Latest Market Price
A11	Price Cursor Line
A12	Market Name

Top Portrait Toolbar

This button returns the user to the detailed market view.

These buttons scroll between markets, based on the markets view from which you loaded the streaming charts.

This button snaps the price cursor (the grey vertical line) back to the latest streaming price point.

Lower Portrait Toolbar

This button is used to change the chart time period. The time period is set to 5 minutes by default, but the next time you use the charting application, the period used last will be shown as default.

These buttons can be used to plot resistance and support lines. When the 'High/Low' buttons are tapped, the lines are placed onto the graph, based on the price high & low for the point selected by the price cursor. When the 'High/Low' buttons are highlighted, they can be moved up and down by sliding them up and down with your finger. Tap on the 'High/Low' button again to fix the lines so that they do not move when the screen is touched.

These lines are removed when you exit the chart.

Further basic and advanced chart settings, including the chart type and indicator variables, can be amended from the chart settings view. See the chart settings section for further information.

b) Landscape Orientation

Landscape streaming charts enlarges the main chart to fill the entire screen. Like in portrait orientation, it is possible to scroll left and right to see more market data by swiping in the top part of the screen, move the price cursor using the bottom part of the screen, and use pinch gestures to zoom in and out.

B1	Select a Chart Time Period
B2	Add Fibonacci Retracement Levels
B3	Flip Fibonacci Retracement Levels
B4	Add High/Resistance Line
B5	Add Low/Support Line
B6	Percentage Change
B7	Previous Market
B8	Next Market
B9	Jump to Latest Market Price
B10	Price Information
B11	Current Price
B12	Price Cursor
B13	Market Name

Landscape Toolbar

In landscape orientation only one toolbar is shown, at the bottom of the screen.

Period	This button is used to change the chart time period. The time period is set to 5 minutes by default, but the app will remember the last period used.
Fib Flip	The 'Fib' button plots Fibonacci retracement levels onto the graph. Like the 'High/Low' buttons, the Fibonacci levels can be dragged left and right, up and down while the button is active. The levels can also be resized using pinch gesturing. The 'Flip' button flips the levels from default 100% as the top level, to 100% as the bottom level.
High Low	As for portrait charting, the 'High' and 'Low' buttons enable support and resistance lines to be plotted on the chart. These lines are removed when you exit the chart.

This button enables the user to see the percentage change of the market price between two points. Simply move the price cursor (by swiping along the bottom of the screen) to the point from which you'd like to measure, press the % button, and then drag from that point to see the percentage change.

These buttons scroll between markets, based on the 'Markets View' from which you loaded the streaming charts.

This button snaps the chart back to the current streaming price.

Chart Settings

The chart settings view can be accessed by tapping the  button on the lower toolbar in portrait mode. In the chart settings, users can change the following settings of the chart view:

- Chart type: Candle, Line, Bar
- Relative Strength Index (RSI)
 - RSI periods
 - Wilders RSI – On/Off
 - Use 80/20 RSI values
RSI will show 70/30 values when OFF
- Moving Average (MA)
 - On/Off
 - MA periods
- Exponential Moving Average (EMA)
 - On/Off
- Stochastic periods
- Moving Average Convergence-Divergence (MACD) periods
- Bollinger Bands
 - On/Off
 - Bollinger periods
- Bollinger EMA – On/Off
- Show H/L Price – On/Off
 - This toggles the display of the price of the High/Low lines
- Stoch/MACD colours – On/Off
 - This toggles colours to be displayed on the Stochastic and MACD indicators

Click 'Done' to save your changes, or 'Cancel' to dismiss any changes.

Technical Analysis Views

Technical indicators can be viewed in the following orientations:

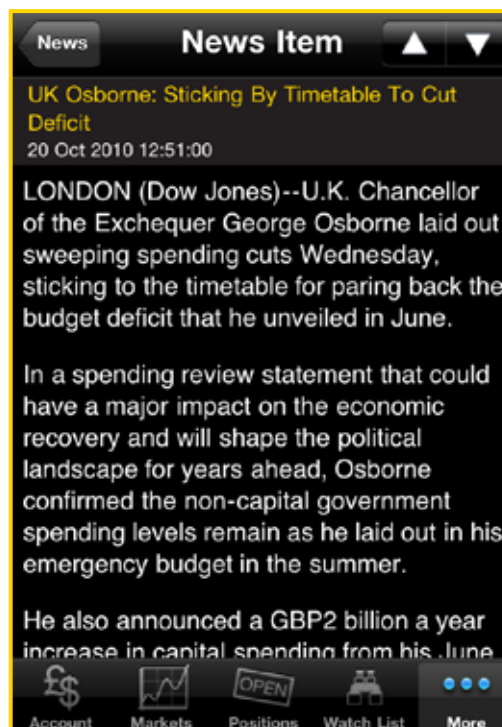

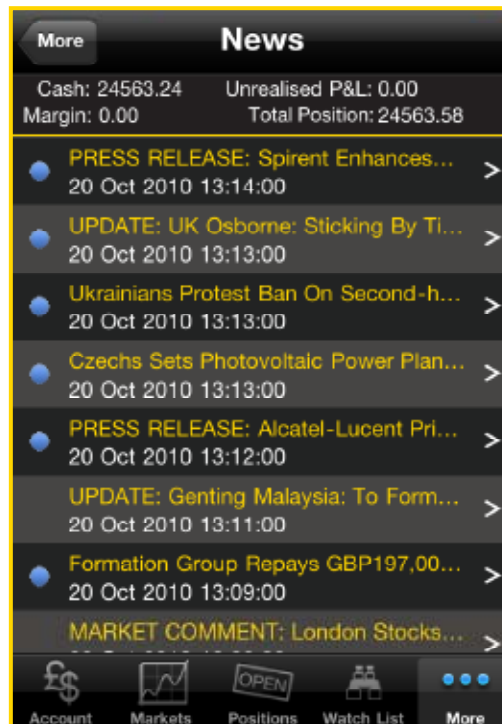

Portrait	Landscape
Relative Strength Index (RSI)	Moving Average (MA)
Stochastic Oscillator	Exponential Moving Average (EMA)
Moving Average (MA)	Bollinger Bands
Moving Average Convergence-Divergence (MACD)	Bollinger Exponential Moving Average (Bollinger EMA)
Exponential Moving Average (EMA)	

7. Streaming News

You can get the latest global investment news from Dow Jones direct from the City Trading app. Our integrated, live, streaming news service updates automatically and features easy navigation between news stories.

The 'More' tab gives you access to our news service and will bring you to a screen that shows you the latest headlines and the broadcast time and date. Tap a headline to access a story.

When you are in a news story you can easily navigate between stories by simply using the up and down arrows.

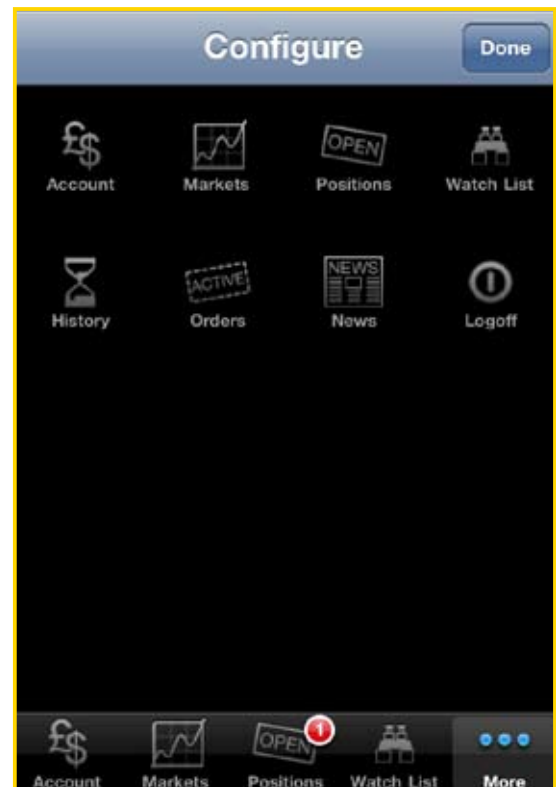

8. More

The More tab gives you access to your Account History, Order History and Log Off button.

Customise tabs

You can use the edit button to customise your trading tabs at the bottom of the City Trading™ App.

Once you have tapped edit, tap and drag the tab that you want and release it over the tab you wish to replace. This means you can switch the tabs available at the bottom of the App to access the ones you want more quickly.

Account History

This tab allows you to view a history of your Trades as well as any cash flow that has gone through your account. By clicking on each entry, you can view the specific details relating to that Trade including:

- Realised profit/loss
- Date of closing trade
- Opening price
