CITYINDEX

CityIndex AU Guide

CFD trading App for the iPhone™ from City Index

CFD trading carries a high level of risk to your capital with the possibility of losing more than your initial investment and may not be suitable for all investors. Ensure you fully understand the risks involved and seek independent advice if necessary. These products are only intended for people who are over 18.

Apple, the Apple logo, iPod, iPod touch, and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries. iPhone is a trademark of Apple Inc. App Store is a service mark of Apple Inc.

Logging in

Once you have downloaded the CityIndex AU App from the App Store, simply tap on the CityIndex AU launch icon and you will be presented with the log in page. Enter your user name (account number) and password and tap 'Login'.

You can also select the 'Remember Me' option which will save your log in details to the application including your password to save you manually entering this information at every log in. Please refer to our [FAQ's](#) for security information.

Please note that you must have a City Index CFD account to access the CityIndex AU App.

The image shows the login screen of the CityIndex AU App. At the top, the 'CITYINDEX' logo is displayed in white and yellow. Below the logo, there are three input fields: 'Account No.' with the value 'AU12345', 'Password' with masked characters '.....', and a 'Remember Me' toggle switch currently set to 'ON'. A 'Login' button is positioned below these fields. At the bottom, a message states 'To apply for an account please visit www.cityindex.com.au', followed by the text 'CityIndex AU' and 'Version 3.4.4'.

Using the Platform

1. Account Summary Tab

When you logon to CityIndex AU you will land on the Account Summary tab.

This section allows you to view your available margin and account summary at a glance.

Currency	Cash	P&L	Net Equity	Margin
Total AUD	62463.02	186.85	62649.65	293.79

Currency is your base currency

Cash is the total current cash equity deposited into the account. E.g. 10,000 has been deposited in this account.

P&L is the unrealised sum of profits/losses across all open positions

Net Equity is the sum of your total cash and unrealised profits/losses across all open positions

Margin is the deposit needed in respect of each open Position on your account

2. Markets Tab

Summary account balances

You can view your account balances on multiple tabs within CityIndex AU such as the Markets, Positions and Watch List tabs. Your account balances will list your total Cash, Unrealised P/L, Margin and Total Position to give you maximum awareness of your account.

Please note that to ensure that your open positions are not closed out, you should avoid the Total Position figure going negative. For further details, please see the [Margin Help Sheet](#) or [Important Documents](#) page.

Finding your market

The Markets page is preset to include 2 search buttons:

Search search for markets

Other search using market groups

Markets				
Cash: 37557.53		Unrealised P&L: 111.28

<div> <div>Account</div> <div>Markets</div> <div>Positions</div> <div>Watch List</div> <div>More</div> </div>				

Using search

To search for your desired market, type in the name of the market and click search. You must enter a minimum of 3 characters.

Using the Other > selector

This search facility works by grouping together similar instruments by category e.g. Indices>Australia. By selecting instruments within these groups, they will automatically replace the default group of Popular markets in the Markets Tab.

3. Managing Watch Lists

You can monitor your favorite markets by grouping them together in a Watch List.

You can view multiple Watch Lists on CityIndex AU. However, please note that if you want to create, rename or delete a Watch List, this will need to be done on the online trading platform. Any changes made on the online trading platform can then be viewed thereafter from CityIndex AU.

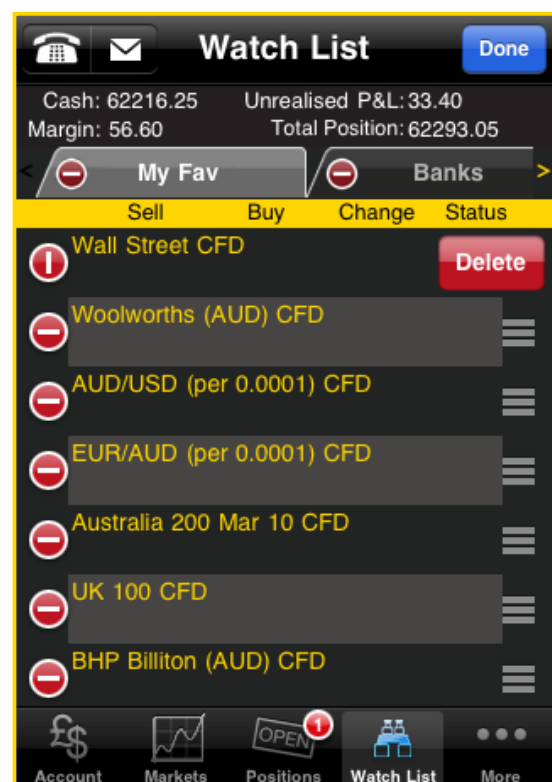

Add/remove markets to a Watch List

To add a market to a Watch List you must first tap on the market and then the 'Add to...' button.

To remove an item from a Watch List you can tap 'edit' within the Watch List tab and select delete on the item you wish to remove. To finish editing your list please tap done.

You can also delete markets from the main Watch List page by swiping your finger across the market you want to delete, and then tap the 'Delete' button.

4. Placing a Trade

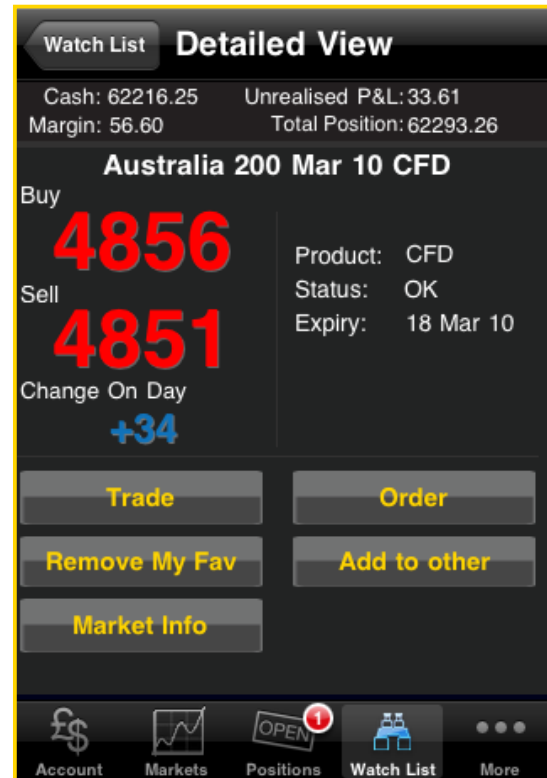

You can place a Trade as well as place and edit Orders from the Detailed View of a market.

Placing a Trade

Step 1

Once you have chosen the market you wish to Trade, tap the specific market and you will be presented with the Detailed View ticket. Tap Trade to open the Trade ticket.

The Trade ticket will then show the BUY and SELL prices for that market. These prices will update in real time.

Step 2

Select BUY or SELL and enter the quantity you would like to Trade.

If you wish to attach a linked Stop or linked Limit to the Trade then enter these in the appropriate boxes.

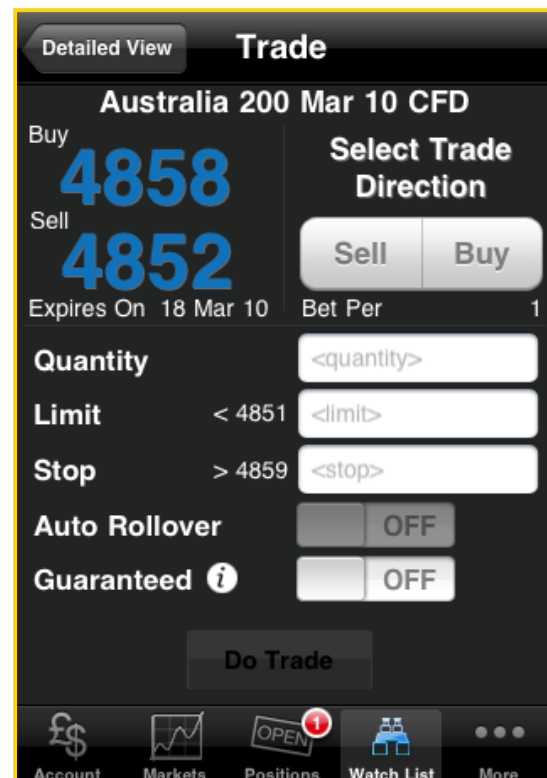

These are types of closing Orders and will be left to Our Quote, Good Till Cancelled (GTC).

If you would like to know more about Order types, please go to our [Orders help sheet](#).

If the market offers guaranteed Orders, you can tick the check box and enter a valid Stop. This will result in a small charge being debited from your account upon confirmation of the Order.

Step 3

To complete your Trade please tap Do Trade.

Step 4

The system will then process the request for a Trade.

If it is successful, a Trade confirmation screen will appear and your new position will appear in your Positions tab.

**Quotes**

If you enter a quantity greater than the maximum size set for a market then your request to Trade will be sent to a dealer who will then send you a price back. You will then have the option to Buy or Sell at the given price in the quantity you have requested.

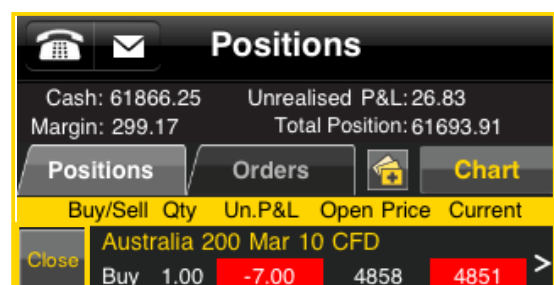

**Closing a Trade**

You can close a Trade by fully closing it, partially closing it or attaching an Order to close.

This functionality can be found in the Positions tab.

Fully Close

Fully close the Trade by tapping on the Close button in the Positions tab. The quantity will automatically appear in the Trade ticket (this is editable if you decide to partially close your position). You can then click on the relevant Buy or Sell button and receive a Trade confirmation.

Partial Close

Partially close the Trade by entering the amount you want to close (less than the quantity currently open) in the quantity box of the Trade ticket before tapping on the relevant Buy or Sell button to Close the position.

Positions **Single Position**

Cash: 61866.25 Unrealised P&L: 25.83

5. Orders

You are able to leave opening and closing orders for trades to be placed when markets reach designated trigger levels. CityIndex AU gives you the facility to leave a variety of Order types.

At all times, the rules regarding orders are governed by our Terms and Policies which can be found [here](#)

Attach a closing Order

You can attach a linked order such as a stop or limit order to an existing trade to close it. This can be done by adding the linked stop or linked limit when you initially place the new trade.

It can also be done by clicking on the position within the Positions tab and selecting Closing Orders.

Positions **Single Position**

Cash: 61866.25 Unrealised P&L: 27.61
Margin: 299.17 Total Position: 61694.69

Cisco Systems CFD

Opening Price: **24.39**
Current Price: **25.94**
Unrealised P & L: **31.00**

Quantity <= 20.00

Good Until Day End Cancelled Time

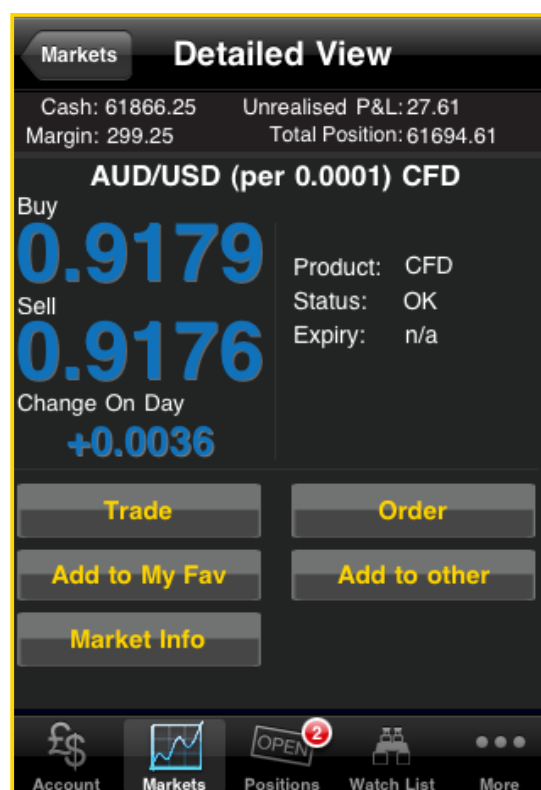

Create Orders

Account Markets **Positions** Watch List More

Placing a new Opening Order

Step 1

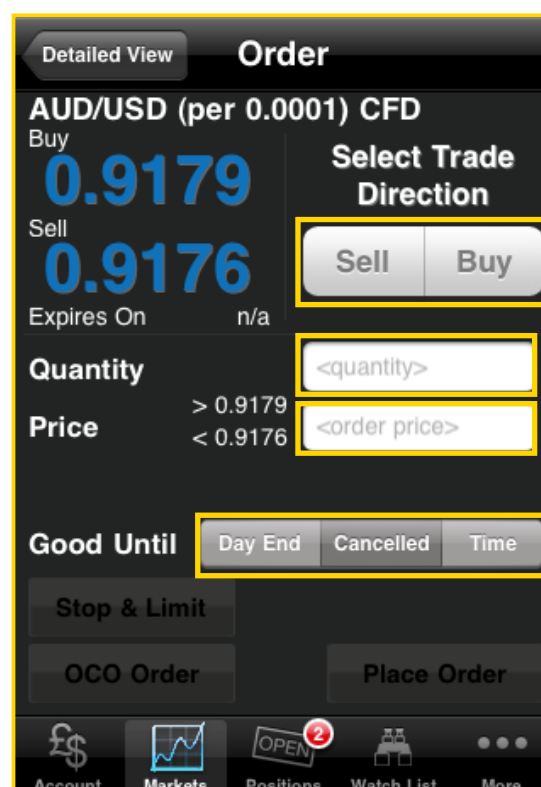

Once you have chosen the market you wish to place an order on, tap it and select order.

Step 2

Fill out the relevant sections of the order including:

Sell or Buy	Whether you want to Sell or Buy the market
Quantity	How much you want to trade
Price Level	What level you wish to enter the market
Good Until	When do you want the order to expire

Step 3

You can attach full or partial if done/contingent orders by clicking on the Stop and Limit button at the bottom of the order form.

You need to fill out the relevant components noted below of the closing order before clicking Set Stop & Limit:

Stop Level	The level you wish to stop all or part of your losses
Quantity	How much you want to trade
Guaranteed	Do you want to guarantee your order price for a small sub charge
Limit Level	The level you wish to take all or part of your profits
Good Until	When do you want the order to expire

If not successful, you will receive the relevant error message explaining why the order has not been placed.

If you leave an order working on GTC, GFD or GTT (please see Order Help Sheet for more information about order types) and the market expires, the order will be deleted automatically. GFD orders are set to expire at the end of day within the time zone of the market and not your local time zone. Thus if you leave an order GFD on Monday, it will delete automatically at the End of day time set for that market.

Details of the trading hours can be found on the Information popup when you click this button. If you leave a GFD on UK 100 Daily Future Tue Spread and it is still Monday, this order will not carry through to the following day; in this instance a more appropriate type of order is GTT or GTC.

Amending an Order

Once an order has been placed, you will then have the option to delete or edit the details of this order. All orders, be they new or contingent orders can be edited from the orders section of the Positions tab. Simply tap on the order you wish to amend, make the relevant changes and click on Update Orders.

Order types

For more details on the types of orders that are available, please go to our [Orders help sheets](#).

The screenshot shows the 'Close Order' interface for AUD/USD (per 0.0001) CFD. The 'Order' button is at the top left. The current price is Sell 0.9176 and Buy 0.9179. The 'Stop' field is set to 0.9100 and the 'Limit' field is set to 0.9199, both highlighted with yellow boxes. The 'Quantity' is 10.00 and the 'Guaranteed' option is OFF. The 'Good Until' section has buttons for 'Day End', 'Cancelled', and 'Time'. A prominent 'Set Stop & Limit' button is at the bottom. The bottom navigation bar includes 'Account', 'Markets', 'Positions' (with an 'OPEN' indicator and a red '2'), 'Watch List', and 'More'.

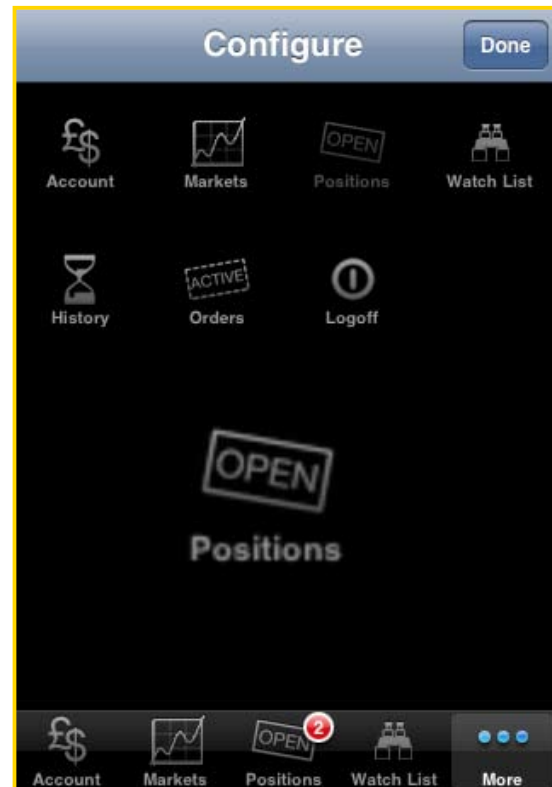

6. More

The More tab gives you access to your Account History, Order History and Log Off button.

Customise tabs

You can use the edit button to customise your trading tabs at the bottom of the CityIndex AU App.

Once you have tapped edit, tap and drag the tab that you want and release it over the tab you wish to replace. This means you can switch the tabs available at the bottom of the App to access the ones you want more quickly.

Account History

This tab allows you to view a history of your Trades as well as any cash flow that has gone through your account. By clicking on each entry, you can view the specific details relating to that Trade including:

- Realised profit/loss
- Date of closing trade
- Opening price
- Closing price
- Serial number
- Quantity
